

Denim

Introducing...

NEW Smead - Denim* Premium Expanding File.

**Expanding files never looked
so good... or functioned so well!**

Check out the NEW moveable tab system.

The top of the divider is slotted, so you can move the tab anywhere you want. Plus, the tabs are blank. You decide how you want to organize – and label – your files.

Talk about expanding!

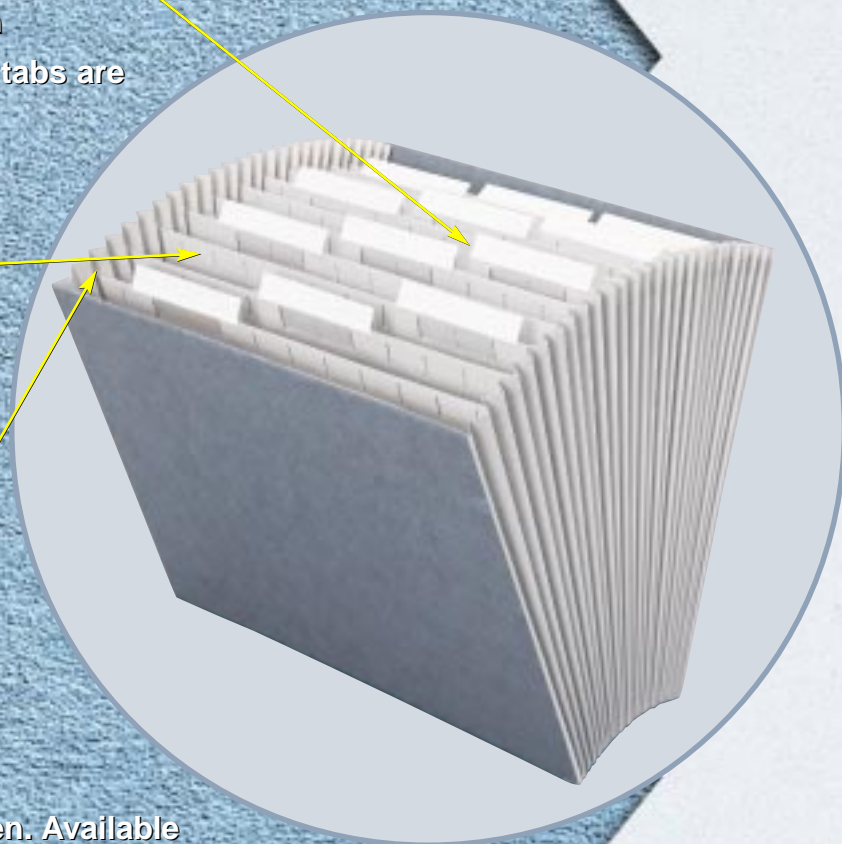

Each of these pockets has twice the capacity as a traditional file. And you know what that means – it holds twice as much material.

Notice how these dividers are recessed.

That protects your file tabs and helps keep them in place.

Four NEW styles to choose from.

Denim, Suede, Maroon Linen and Navy Linen. Available in 6 and 12 pockets letter size and 12 pocket legal size.

* A simulated
denim-like product
